

Do you want to build the world's most exciting physics experiments?

PhD Opportunities at the Cockcroft Institute of Accelerator Science and Technology

Would you like to work on the LHC and produce Higgs bosons, design next generation cancer therapy, develop safe nuclear reactors or build the worlds most advanced scientific instruments? If so the Cockcroft Institute is the place for you.

The Cockcroft Institute is a collaboration between Lancaster, Manchester, and Liverpool Universities with the Science and Technology facilities council to develop the next generation of particle accelerators. We are currently looking for PhD students to join us in this venture.
